PATENT

## REMARKS

Claims 1-9 are pending in the application.

Claim 8 has been rejected.

Claims 1-7, 9 have been allowed.

Claims 1-9 remain pending in this application.

Reconsideration of the claims is respectfully requested.

## I. CLAIM REJECTIONS -- 35 U.S.C. § 102

Claim 8 was rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 6,522,192 to *Sander* (hereinafter "Sander"). This rejection is respectfully traversed.

A cited prior art reference anticipates the claimed invention under 35 U.S.C. § 102 only if every element of a claimed invention is identically shown in that single reference, arranged as they are in the claims. MPEP § 2131; In re Bond, 910 F.2d 831, 832, 15 U.S.P.Q.2d 1566, 1567 (Fed. Cir. 1990). Anticipation is only shown where each and every limitation of the claimed invention is found in a single cited prior art reference. MPEP § 2131; In re Donohue, 766 F.2d 531, 534, 226 U.S.P.Q. 619, 621 (Fed. Cir. 1985).

Independent Claim 8 recites "a boost converter having voltage selectable modes, the boost converter comprising a first selection terminal and a second selection terminal." The claim also recites "a capacitive boost circuit, wherein the capacitive boost circuit is utilized in a capacitive mode." The claim further recites "an inductive boost circuit, wherein the inductive boost circuit is

-6-

utilized in an inductive mode; and a mode selection circuit, wherein the mode selection circuit

selects the capacitive mode if a voltage source is connected to the first selection terminal and selects

the inductive mode if the voltage source is connected to the second selection terminal."

The Applicant respectfully submits that Sander does not disclose a mode selection circuit,

wherein the mode selection circuit selects the capacitive mode if a voltage source is connected to the

first selection terminal and selects the inductive mode if the voltage source is connected to the

second terminal as recited by Claim 1. Accordingly, the Applicant respectfully requests that the

Examiner withdraw the § 102 rejection with respect to Claim 1 and its dependent claims.

The Office Action argues that Sander (T1, T2 and Abstract) teaches each and every element,

as arranged and recited in Claim 1. (Office Action, page 2). Sander teaches a boost doubler circuit

wherein switches (SW3 and SW2) are turned on to introduce a deliberate overlap of the clock such

that both the inductive component and capacitive component operate at the same time. (Sander,

col. 2, lines 40-64). Sander contains no disclosure for selecting of modes. Sander (T1) describes a

first clock and (T2) describes a second clock. However, Sander (Figure 5) illustrates a deliberate

overlapping of the clock signals.

-7-

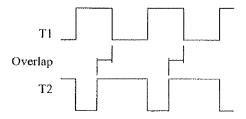

Fig. 5

Sander teaches, and is limited to teaching, a boost circuit configured to have both the inductive component and capacitive component operate at the same time. Sander does not contemplate "a mode selection circuit, wherein the mode selection circuit selects the capacitive mode if a voltage source is connected to the first selection terminal and selects the inductive mode if the voltage source is connected to the second terminal" as arranged and recited by Claim 1

Accordingly, the Applicant respectfully requests that the § 102 rejection with respect to Claim 8 be withdrawn.

## II. ALLOWABLE SUBJECT MATTER

The Applicant thanks the Examiner for allowing Claims 1-7 and 9.

DOCKET NO. NL031198US1 (STNX01-31198) SERIAL NO. 10/575,642

**PATENT** 

**CONCLUSION** 

As a result of the foregoing, the Applicant asserts that the remaining Claims in the

Application are in condition for allowance, and respectfully requests an early allowance of such

Claims.

If any issues arise, or if the Examiner has any suggestions for expediting allowance of this

Application, the Applicant respectfully invites the Examiner to contact the undersigned at the

telephone number indicated below or at rmccutcheon@munckcarter.com.

The Commissioner is hereby authorized to charge any additional fees connected with this

communication or credit any overpayment to Deposit Account No. 50-0208.

Respectfully submitted,
